1. NATURE AND CONTINUANCE OF OPERATIONS

First Point Minerals Corp. (the "Company") is incorporated under the *Business Corporations Act* (Alberta) and is involved in the acquisition and exploration of mineral property interests that are considered potential sites of economic mineralization. At the date of these condensed consolidated interim financial statements, the Company has not identified a known body of commercial grade ore on any of its properties and the ability of the Company to recover the costs it has incurred to date on these properties is dependent upon the Company being able to identify a commercial ore body, to finance its exploration and development costs and to resolve any environmental, regulatory, or other constraints which may hinder the successful development of the property.

The Company has not generated revenue from operations. The Company incurred a net loss of $883,464 during the nine months ended September 30, 2015 and as of that date the Company's deficit was $30,551,062. As the Company is in the exploration stage, the recoverability of the costs incurred to date on exploration properties is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development of its properties and upon future profitable production or proceeds from the disposition of the properties.

While the Company's working capital position at September 30, 2015 was $1,052,838, the Company will periodically have to raise funds to continue operations and, although it has been successful in doing so in the past, there is no assurance it will be able to do so in the future. These condensed consolidated interim financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence.

On September 8, 2015, the Company announced that it has entered into a binding agreement with affiliated companies of Cliffs Natural Resources Inc. ("Cliffs") to purchase Cliffs' 60% ownership of First Point's flagship Decar nickel project, located in central British Columbia, for an acquisition price of US $4.75 million ("the Transaction"). Completion of the Transaction will result in First Point owning 100% of the Decar project. To finance the Transaction, First Point has entered into an arm's-length loan agreement with an individual shareholder of First Point ("the Lender"), through which the Lender will lend US $5.0 million to the Company for a five-year period at a 6.5% headline interest rate. Of this, 1.5% will be paid currently, on a semi-annual basis, and the remaining 5% interest will be accrued and paid at the end of the loan term. In addition, the Lender will receive a drawdown fee equal to 4% of the loan amount and receive a 1% net smelter return ("NSR") royalty over the Decar project. Closing of the Transaction, which is expected to occur on or around November 18, 2015, is subject to the fulfillment of certain customary conditions, including the approval of First Point's minority shareholders.

These condensed consolidated interim financial statements include the financial statements of the Company and its subsidiaries. They are presented in Canadian dollars, which is the functional currency of the Company and its subsidiaries.

The head office and principal address of the Company is Suite 200 – 1155 West Pender Street, Vancouver, British Columbia V6E 2P4. The Company's registered and records office is 4500 Bankers Hall East, 855 Second Street SW, Calgary, Alberta T2P 4K7.

2. BASIS OF PREPARATION

(a) *Statement of compliance*

The condensed consolidated interim financial statements for the three and nine months ended September 30, 2015 were prepared in accordance with International Accounting Standard ("IAS") 34 *Interim Financial Reporting* as issued by the International Accounting Standards Board ("IASB") on a basis consistent with those followed in the most recent annual consolidated financial statements.

These condensed consolidated interim financial statements do not include all of the information required for full annual financial statements and were approved and authorized for issue by the Board of Directors on November 12, 2015.

(b) *Basis of measurement*

These condensed consolidated interim financial statements have been prepared on a historical costs basis except for financial instruments classified as financial instruments at fair value through profit or loss or available-for-sale, which are stated at their fair value. In addition, these condensed consolidated interim financial statements have been prepared using the accrual basis of accounting.

The preparation of these condensed consolidated interim financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the condensed consolidated interim financial statements and the reported expenses during the period. Although management uses historical experience and its best knowledge of the amounts, events or actions to form the basis for judgments and estimates, actual results could differ from these estimates.

7. RECLAMATION DEPOSITS

The Company has provided deposits as security against potential future reclamation work relating to two of its mineral properties. As at September 30, 2015, a total of $23,238 (December 31, 2014 - $23,036) has been provided in the form of Guaranteed Investment Certificates posted with the Minister of Finance for the Province of British Columbia for the benefit of the provincial Ministry of Energy and Mines.

8. MARKETABLE SECURITIES

Marketable securities consist of equity securities over which the Company does not have control or significant influence. Marketable securities are designated as available-for-sale. Unrealized gains and losses due to period end revaluations to fair value are included in other comprehensive loss for the period. At September 30, 2015, the Company owned 1,038,916 (December 31, 2014 - 1,038,916) shares of Aquila Resources Inc., the shares of which are traded on the Toronto Stock Exchange.

9. EXPLORATION AND EVALUATION ASSETS

As at September 30, 2015, the Company holds interests in five nickel properties, four of which are located in British Columbia, and one of which is located in the Yukon Territory. These properties were acquired by staking and the Company has a 100% interest in each of the properties, other than the Decar property located in central British Columbia, which is held in a joint venture with an affiliated company of Cliffs. With the exception of the Decar property, the Company's nickel properties are all in the early stage of exploration. The Company also holds one concession in Honduras that is presently on "care and maintenance" but which has been explored for gold in the past.

Canada

Nickel Properties, British Columbia and Yukon Territory

Under the terms of an option agreement entered into in November 2009, Cliffs had the right to earn an initial 51% interest in the Decar property by spending US$4,500,000 on the property over four years. In mid-September, 2011, Cliffs committed to completing a National Instrument 43-101 compliant preliminary economic assessment ("PEA") on the Decar property. Pursuant to an amended agreement dated September 21, 2011, by agreeing to complete the scoping study within 18 months, Cliffs was deemed to have earned an initial 51% interest in the Decar property and the Company was deemed to have earned a 1% NSR royalty in the Decar property. On delivery of the PEA in April 2013, Cliffs earned an additional 9% interest in the Decar property, bringing its aggregate interest to 60%.

In August 2015, the structure of ownership of the Decar project converted to a contractual joint venture, with initial ownership interests fixed at 60% for Cliffs and 40% for First Point. Cliffs acts as the joint venture operator, and First Point retains a 1% NSR royalty in the Decar property. Under the terms of the joint venture agreement, the parties' funding obligations to approved budgets is in proportion to their respective participating interests. A party that does not fully fund its share of approved budgets will have its participating interest diluted and the other party's participating interest will be correspondingly increased. Should either party's participating interest in the joint venture be reduced to less than 10%, its interest will automatically be converted to a 1% NSR royalty interest. If the Company is the converting party, it will have, in the aggregate, a 2% NSR royalty interest.

In September 2015, the Company announced that it has entered into a binding agreement with affiliated companies of Cliffs to purchase Cliffs' 60% ownership of First Point's flagship Decar nickel project, located in central British Columbia, for an acquisition price of US $4.75 million. Completion of the Transaction will result in First Point owning 100% of the Decar project. To finance the Transaction, First Point has entered into an arm's-length loan agreement with an individual shareholder of First Point, through which the Lender will lend US $5.0 million to the Company for a five-year period at a 6.5% headline interest rate. Of this, 1.5% will be paid currently, on a semi-annual basis, and the remaining 5% interest will be accrued and paid at the end of the loan term. In addition, the Lender will receive a drawdown fee equal to 4% of the loan amount and receive a 1% NSR royalty over the Decar project. Closing of the Transaction, which is expected to occur on or around November 18, 2015, is subject to the fulfillment of certain customary conditions, including the approval of First Point's minority shareholders.

During the year ended December 31, 2014, deferred acquisition and exploration costs incurred on three of the Company's British Columbia nickel properties (Wale, Orca and Klow) totaling $2,441,636 were written off as the Company has no plans at this time to perform significant work on those properties. The Company retains the underlying mineral claims for the Wale, Orca, and Klow nickel properties in good standing. As of September 30, 2015, the Wale, Orca and Klow properties are carried at a nominal value of $1.00 per property.

During the year ended December 31, 2014, the Company dropped the mineral claims for the Letain nickel property in British Columbia and wrote off deferred acquisition and exploration costs totaling $41,185.

9. EXPLORATION AND EVALUATION ASSETS *(continued)*

Norway

Fera & Leka Exploration Concessions

In 2012, the Company acquired mining licenses comprising the Fera and Leka exploration concessions, covering approximately 160 square kilometres ("sq km"). During the year ended December 31, 2012, when it was determined that the resource potential of certain concessions was unlikely to warrant further expenditures, the Company dropped the Leka property and reduced its holdings at Fera. During the year ended December 31, 2014, when it was determined that the resource potential of the remaining Fera concessions was unlikely to warrant further expenditures, the Company dropped those concessions and wrote off deferred acquisition and exploration costs totaling $176,381.

Honduras

Camporo Property

The Company acquired a 60% interest in the Camporo property in southern Honduras, subject to a 0.6% NSR royalty interest, from Minera Battle Mountain Gold Company ("BMG") by incurring exploration expenditures of US$1,000,000 (incurred) and issuing 700,000 common shares (issued). The Company has an option to earn the remaining 40% interest in this property from a Honduran subsidiary of Breakwater Resources Ltd. The consideration to be paid to acquire Breakwater's interest in the property will consist of: (i) 500,000 First Point common shares ("Common Shares") if the value of a Common Share is $0.20 or higher to a maximum of $1.00 per Common Share provided that the number of Common Shares to be issued will have a maximum fair market value of not more than $500,000, or (ii) if the fair market value of a Common Share is less than $0.20, a combination of 500,000 Common Shares and a cash payment in an amount equal to $100,000 less the value of the 500,000 Common Shares, which value shall be determined using the weighted average price per Common Share calculated over the five trading days preceding the relevant date.

Breakwater will retain a sliding scale royalty of 0.4% of the gross gold sale proceeds starting at US$325 per ounce and rising to a maximum of 1.2% of the gross gold sale proceeds at US$400 per ounce and of 0.4% of the gross silver sale proceeds starting at US$5.25 per ounce and rising to a maximum of 1.2% of the gross silver sale proceeds at US$7.00 per ounce. The property is carried at a nominal value of $1.00.

Cedros Property

During 2008, the Company re-acquired an option to obtain a 100% interest in three mineral concessions and exploration permits in the Cedros region. To complete its acquisition and obtain title to the property the Company would have been required to issue 225,000 shares at any time and would have been obligated to pay a 2% NSR royalty on production, which royalty could have been purchased by the Company at any time for US$1,000,000. During the year ended December 31, 2013, the Company dropped its option on the Cedros Property and wrote off the property's $1 nominal carrying value.

(c) Stock options

The Company has an incentive stock option plan that conforms to the requirements of the Toronto Stock Exchange. Options to purchase common shares have been granted to directors, employees and consultants of the Company at exercise prices determined by their market value on the date of the grant. The options vest immediately on the date of the grant or as otherwise determined at the discretion of the Board. Stock option transactions during the periods ended December 31, 2014 and September 30, 2015 and the number of stock options outstanding and exercisable at September 30, 2015 are summarized as follows:

	Number of Options	Weighted-Average Exercise Price	Weighted-Average Contractual Remaining Life (Years)
Balance, December 31, 2013	**8,903,000**	**0.63**	**2.39**
Granted	1,375,000	0.15	
Cancelled	(86,000)	0.65	
Expired	(1,600,000)	0.35	
Balance, December 31, 2014	**8,592,000**	**0.61**	**2.17**
Expired	(1,625,000)	0.68	
Balance, September 30, 2015	**6,967,000**	**0.59**	**1.83**
Exercisable at September 30, 2015	**6,967,000**		

The weighted average share price for stock options exercised during the nine months ended September 30, 2015 is nil (2014 – nil).

Summary of stock options outstanding at September 30, 2015:

Number Outstanding	Exercise Price ($)	Expiry Date

(d) Share-based compensation:

On September 5, 2014, the Company granted directors, officers, and employees an aggregate of 1,375,000 options to purchase shares at an exercise price of $0.15 per share, all of which vested immediately. The options will expire on September 5, 2019. The fair value of the options granted was $123,289, or $0.0897 per option.

The weighted average fair value of stock options granted during the nine months ended September 30, 2015 and the year ended December 31, 2014 was estimated using the Black-Scholes option pricing model with the following weighted average assumptions:

	Nine months ended September 30, 2015	Year ended December 31, 2014
Expected dividend yield	Nil	0%
Risk-free interest rate	Nil	1.58%
Expected stock price volatility	Nil	106%
Expected life of options	Nil	5 years
Weighted average fair value per stock option	Nil	$0.0897

Share-based compensation expense of nil was recorded during the nine months ended September 30, 2015 (2014 - $143,164). The offsetting credit was to other equity reserve.

Option pricing models require the input of highly subjective assumptions, particularly as to the expected price volatility of the stock. Changes in these assumptions can materially affect the fair value estimate and therefore it is management's view that the existing models do not necessarily provide a single reliable measure of the fair value of the Company's stock option grants.

(e) Warrants

Warrant transactions during the year ended December 31, 2014 and the nine months ended September 30, 2015 and the number of warrants outstanding at September 30, 2015 are summarized as follows:

The following is a summary of the components of other equity reserve at September 30, 2015 and December 31, 2014:

	September 30, 2015	December 31, 2014
Share options	$ 4,799,848	$ 4,799,848
Finders' warrants	357,647	357,647
Total other equity reserve	$ 5,157,495	$ 5,157,495

12. LOSS PER SHARE

Loss per share has been calculated using the weighted-average number of common shares outstanding during the period. Diluted loss per share has not been calculated as it is anti-dilutive.

13. RELATED PARTY TRANSACTIONS

At September 30, 2015, accounts payable and accrued liabilities included $30,604 (December 31, 2014 – $15,639) due to related parties. Amounts due to related parties are unsecured, non-interest bearing and have no specific terms of repayment.

During the nine months ended September 30, 2015, the Company entered into the following related party transactions:

- paid or accrued $203,125 (2014 - $243,750) in salary to James S. Gilbert, the Company's President and Chief Executive Officer, for management and administrative services.

- paid or accrued $15,000 (2014 - $22,500) in salary to Peter M.D. Bradshaw, the Company's Non-executive Chairman, for management and administrative services.

- paid or accrued $118,750 (2014 - $142,500) in salary to Ronald M. Britten, the Company's Vice President - Exploration, for management and administrative services.

(Stated in Canadian Dollars)

13. RELATED PARTY TRANSACTIONS *(continued)*

- paid or accrued $44,025 (2014 - $44,025) in salary to Rob Robertson, the Company's Vice President – Corporate Development, for management and administrative services.

- paid or accrued $75,500 (2014 - $50,250) in fees to Adera Company Management Inc., a private company controlled by J. Christopher Mitchell, the Company's Corporate Secretary, for management and administrative services.

- Paid or accrued $80,511 (2014 - $92,760) in fees to Martin Turenne Consulting Ltd., a private company controlled by Martin Turenne, the Company's Chief Financial Officer, for management and administrative services.

The amounts charged to the Company for the services provided have been determined by negotiations between the parties and are covered by a signed agreement. These services were in the normal course of operations and management believes that they were incurred on a basis consistent with comparable transactions between other non-related parties.

The Company considers its Officers to be key management personnel. Amounts paid to the key management personnel during the nine months ended September 30, 2015 and 2014 are shown in the following table:

	2015	2014
Salaries or fees	$ 536,911	$ 595,785
Share-based payments	-	77,480
Total key management personnel	$ 536,911	$ 673,265

14. COMMITMENTS

The Company's current lease on its existing premises will expire on May 31, 2016. At September 30, 2015, the remaining lease obligation is $70,344.

15. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Fair value

IFRS 7 establishes a fair value hierarchy that prioritizes the input to valuation techniques used to measure fair value as follows:

Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;
Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

(Stated in Canadian Dollars)

15. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT *(continued)*

Financial instruments measured at fair value on the consolidated statements of financial position are summarized in levels of fair value hierarchy as follows:

	September 30, 2015	December 31, 2014
	Level 1	Level 1
Cash and cash equivalents	$ 1,113,668	$ 1,930,883
Marketable securities	135,059	103,892

The carrying value of receivables, reclamation bonds and accounts payable and accrued liabilities approximate their fair value because of the short-term nature of these instruments.

Risk Management

The Company is exposed to a variety of financial risks by virtue of its activities, including credit risk, interest rate risk and liquidity risk. The overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on financial performance. Risk management is carried out by management under the direction and guidance of the Board of Directors. Management is responsible for establishing controls and procedures to ensure that financial risks are mitigated to acceptable levels.

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit risk

Credit risk is the risk of potential loss to the Company if a customer or counterparty to a financial instrument fails to meets its contractual obligations. The Company's credit risk is limited to the carrying amount on the statements of financial position and arises from the Company's cash and cash equivalents, marketable securities, receivables, including GST receivable, and reclamation deposits.

The Company's cash and cash equivalents and marketable securities are held in accounts with Canadian chartered banks and a brokerage firm. Cash in excess of the amounts needed to fund the Company's day-to-day operating expenses is invested in securities guaranteed by the federal or British Columbia government. The reclamation deposits are in the form of Guaranteed Investment Certificates pledged to the Minister of Finance for the Province of British Columbia to cover the estimated cost of reclaiming the Company's exploration projects.

Liquidity risk

Liquidity risk is the risk that the Company will not meet its financial obligations as they fall due. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at September 30, 2015, the Company had cash balances of $1,113,668 to settle current liabilities of $88,675. All of the Company's financial liabilities have contractual maturities of 30 days or are due on demand and are subject to normal trade terms.

Since inception, the Company has financed its cash requirements primarily by issuing securities.

15. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT *(continued)*

The timing of cash outflows relating to financial liabilities is outlined in the table below:

	< 1 year	1 – 3 years	4 -5 years	Total
Accounts payable and accrued liabilities	$88,675	$-	$-	$88,675

At September 30, 2015, the Company had met all the obligations associated with its financial liabilities.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates and foreign exchange rates. At September 30, 2015, the Company was not exposed to significant market risk due to the short-term nature of the receivable balance.

(a) Interest rate risk

The Company has cash balances and no interest-bearing debt. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of the financial institutions it deals with and the securities in which its funds are invested. See Note 18, Events After the Reporting Date.

(b) Foreign currency rate risk

The Company's functional currency is the Canadian dollar and major purchases are transacted in Canadian dollars. The Company funds certain operations, exploration and administrative expenses in the United States and other foreign countries by converting funds from its Canadian dollar bank accounts and wiring US funds to the foreign counterparty. Management believes the foreign exchange risk derived from currency conversions is insignificant and therefore does not hedge its foreign exchange risk.

Sensitivity Analysis

The Company works toward its capital management objectives to the extent possible while facing the challenges of market conditions and the public's assessment of the Company's risk profile. Its capital management objectives have not changed over the period presented.

The carrying value of cash, marketable securities, receivables, reclamation bond, accounts payable and accrued liabilities approximate their fair values due to the relatively short periods to maturities of these financial instruments.

Based on management's knowledge of and experience in the financial markets, management does not believe that the Company's current financial instruments will be materially affected by credit risk, liquidity risk or market risk.

The Company has no debt and accordingly is not subject to any financial covenants. The Company monitors its financing requirements through cash forecasting, consideration of current economic conditions and reviews of economic and political commentaries in respect of future developments. Financing decisions are based on the timing and extent of expected operating and capital cash outlays. Factors considered when determining whether to issue equity include the amount of cash sought, the availability of these sources and their terms. See Note 18, Events After the Reporting Date.

(Stated in Canadian Dollars)

16. CAPITAL MANAGEMENT

At September 30, 2015, the Company had working capital of $1,052,838. The Company manages its cash, cash equivalents and common shares as capital. The Company's objectives in managing its capital are to:

- Maintain sufficient cash and cash equivalents to last a minimum of one year;
- Have the flexibility to achieve its on-going business objectives, including but not limited to funding work programs on its exploration and evaluation assets and pursuing new business opportunities as they arise, and
- Minimize dilution to existing shareholders.

The Directors have not specified a quantitative return on capital criteria for management, but rather rely on the expertise of management to sustain future development of the business.

The Company's exploration and evaluation assets are in the development stage and the Company does not generate a positive cash flow. As a consequence, the Company relies on accessing the capital markets to obtain the funds needed to carry on its business. It is the Company's intention to utilize its existing working capital and to raise additional funds as needed. The additional funds will be raised primarily through the issuance of its securities in private placements.

17. SEGMENTED INFORMATION

The Company operates in one reportable operating segment being the exploration of mineral properties. A geographic summary of minerals properties and net loss by country, as at and for the year ended December 31, 2014 and the nine months ended September 30, 2015, is as follows:

Mineral properties	1,782,060	1	-	1,782,061

18. EVENTS AFTER THE REPORTING DATE

On September 8, 2015, the Company announced that it has entered into a binding agreement with affiliated companies of Cliffs to purchase Cliffs' 60% ownership of First Point's flagship Decar nickel project, for an acquisition price of US $4.75 million. Completion of the Transaction will result in First Point owning 100% of the Decar project. To finance the Transaction, First Point has entered into an arm's-length loan agreement with an individual shareholder of First Point, through which the Lender will lend US $5.0 million to the Company for a five-year period at a 6.5% headline interest rate. Of this, 1.5% will be paid currently, on a semi-annual basis, and the remaining 5% interest will be accrued and paid at the end of the loan term. In addition, the Lender will receive a drawdown fee equal to 4% of the loan amount and receive a 1% NSR royalty over the Decar project. Closing of the Transaction, which is expected to occur on or around November 18, 2015, is subject to the fulfillment of certain customary conditions, including the approval of First Point's minority shareholders.
